CONSTANTA P

COLORIS®

Solvent-based stamping ink developed using highest quality pigments for marking legal documents and cheques as well as certificates and bonds. The special colour pigments cannot be removed subsequently in chemical processes. The CONSTANTA P also has a very high resistance to light, so that the marking does not bleach out.

Properties:
It soaks into the paper quickly and has particularly sharp edges. This stamping ink covers well and remain moist for stamping for a long period in the stamp pad.

Application:
We recommend CONSTANTA P for marking legal documents and sworn statements such as certificates or certifications requiring indelible marking.

Drying time:
~30sec smudge-proof (paper)

Viscosity:
highly viscous ~20sec
(Ford 4mm cup)

Stamp material:
Rubber, metal or special photo polymers

Stamp pad material:
We recommend unsaturated COLORIS SP pads, felt plate pads or the SOLI-plate pads. The ink remains moist for stamping for a long period without drying out in all stamp pads.

Thinner/cleaner:
Thinner 440 Available standard

Available standard sizes:
50ml/g · 250ml/g · 1000ml/g
