777

COLORIS®

Low viscosity, solvent-based stamping ink developed especially for automatic printing on absorbent surfaces.

Properties:
This stamping ink is very economical and produces waterproof, quick-drying impressions. Also available as a slightly more viscous version 777 HV or a pigmented version 777 P in different colours, which is particularly suitable for dark surfaces.

Application:
We recommend this stamping ink for cardboard, paper sacks and other similar absorbent materials.

Drying time:
~10sec smudge-proof (paper)

Viscosity:
ow viscosity, ~10sec
(Ford 4mm cup)

Stamp material:
Rubber or special photo polymers

Stamp pad material:
For automatic marking we recommend presses with rubber or foam ink rollers which operate with ink reservoirs.
For manual stamping, felt plate and foam pads as well as foam rubber rollers are suitable. The ink remains moist for stamping for a long period without drying out in stamp pads.

Thinner/cleaner:
Thinner 430

Available standard sizes:
250ml/g · 1000ml/g · 5000ml/g
