382 E2 P

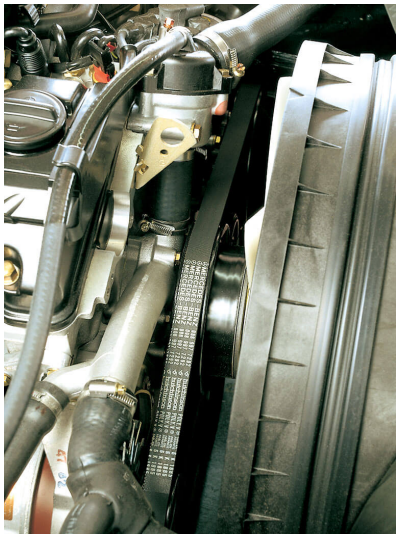
COLORIS®

382 E2 P is a quick drying, pigmented, solvent-based stamping ink with extremely good coverage which provides colour fast prints which are extremely resilient after drying.

Properties:
Also available as slower drying version 382 P silver.
The silver-coloured prints are extremely uniform with sharp edges and a covering intensity far exceeding most white-pigmented stamp pad inks. Particularly suitable for marking dark-coloured materials because of the excellent contrast.

Application:
We recommend 382 E2 P for marking dark background rubber as well as for metals, plastics, textiles and untreated wood. The binding agent makes this pigmented stamping ink excellent for applications with high operating temperatures such as V-belts and electrical resistors.

Drying time:
~5 min (metal)



Viscosity:
low viscosity, ~25sec
(Ford 4mm cup)

Stamp material:
Rubber or special photo polymers

Stamp pad material:
We recommend only felt plate pads for 382 E2 P. In the case of automatic stamping machines, systems with an ink reservoir are preferred.

Thinner/cleaner:
Thinner 415

Available standard sizes:
50ml/g · 250ml/g · 1000ml/g
