

Water-based solvent mixture for thinning special stamping inks and diluting to desired viscosity.

Even stamp pads with highly viscous ink can sometimes be refreshed by adding small quantities of thinner.

Caution:

However, diluting too highly can lead to loss of important physical properties such as adhesion, covering capacity or colour intensity!

Application:

We recommend this thinner for all water-based solvents inks such as:

Luminous stamping ink I/ST, stamping inks 500, 777, 840P, 843P, 4010 or without oil.

Thinning instructions:

Pour a quantity of ink into a container, add a small quantity of thinner and stir. Continue to add small amounts of thinner until desired viscosity is reached.

Available standard sizes:

50ml/g · 250ml/g · 1000ml/g · 5000ml/g
