# Thinner 475

### 

## An ketone like solvent mixture for thinning special stamping inks and to get the right viscosity

Stamp pads with dried/highly viscous ink can sometimes be refreshed by adding small quantities of thinner.

#### Caution:

Diluting too highly can lead to loss of important physical properties such as adhesion, covering capacity or color intensity!

#### Application:

We recommend this thinner for the following solvent-based inks: Plastic stamping ink 50 and 50P

#### Thinning instructions:

Pour a quantity of ink into a container, add a small quantity of thinner and stir. Continue to add small amounts of thinner until desired viscosity is reached.

#### Available standard sizes:

50ml/g · 250ml/g · 1000ml/g · 5000ml/g
