121 P

COLORIS®

Quick drying, pigmented solvent-based stamping ink developed especially for absorbent surfaces.

Properties:
The high resistance of this ink to the effects of light and weather is guaranteed by use of high quality colour pigments. Fast drying imprints with intense colour are possible on a large variety of materials.

Application:
We recommend this stamping ink for cardboards, untreated wood, jute and paper bags and other absorbent material. The spectrum of application also includes finished wood and metal surfaces. Large characters and markings can be applied most quickly with this ink using a brush and stencil, however use in felt ink roller systems is also possible.

Drying time:
~60-90sec (metal)

Viscosity:
ow viscosity, ~20-50sec
(Ford 4mm cup)

Stamp material:
Rubber or special photo polymers

Stamp pad material:
For automatic marking we recommend presses which operate with ink reservoirs. For manual stamping, felt plate and Soli plate pads are suitable.

Thinner/cleaner:
Thinner 121

Available standard sizes:
50ml/g · 250ml/g · 1000ml/g
