SIGNO-Spray P

COLORIS®

High quality ink with intensive colour available in 400ml spray cans. The propellent gas consists exclusively of an ecological mixture of propane/butane.

Properties:
This marking ink is very economical, flexible, water-proof, quick drying and particularly colour fast. Moreover, the ink adheres to a large variety of materials. The colour pigments contained can be mixed up easily within a very short time without problems even after long periods of storage. The colour is indicated on the cap or label.

Application:
This ink is particularly suitable for marking cardboard boxes, paper sacks and wooden crates, as well as metal drums and plastic containers or similar materials.

Drying time:
~15sec (metal) Signo-Spray P

Percentage of solids:
>20%

Marking material:
Stencils

Processing:
We recommend holding the spray can approx. 20cm away from the surface and spraying over the stencil a number of times in a crisscross pattern to avoid runs.

Thinner/cleaner:
Thinner 475

Available standard sizes:
Spraycan 400ml
