# KRO 4714 P

COLORIS®

**KRO 4714 P is a quick drying, pigmented, stamping ink providing extremely good coverage, colour fast and weather-proof imprints. Suitable primarily for non-absorbent, dark background (also some light background materials).**

**Properties:**
It provides smudge-proof prints which can hardly be removed and are durable even on extremely difficult surfaces and are even resistant to various acids.

**Application:**
We recommend KRO 4714 P for marking painted and unpainted dark metals and plastics. We also particularly recommend use on plastic and rubber tubing in the automotive sector, because this ink satisfies the European old car code (2000/53/EC). A suitability test should be carried out as there are too many different qualities available to enable a reliable recommendation.

**Drying time:**
~30sec (metal)

**Viscosity:**
low viscosity, ~20 - 40sec
(Ford 4mm cup)

**Stamp material:**
Rubber, metal or special photo polymers

**Stamp pad material:**
We recommend felt plate pads for KRO 4714 P, however, Soli plate pads and ink rollers are also possible. In the case of automatic stamping machines, systems with an ink reservoir are preferrable.

**Thinner/cleaner:**
Thinner 410

**Available standard sizes:**
50ml/g · 250ml/g · 1000ml/g
