947 IV

COLORIS®

947 IV was developed especially for printing presses using cartridges with integrated felt or foam rubber reservoir. The binding agent prevents the ink cartridge diaphragms from sticking.

Properties:
This ink dries very quick, provides an intense colour and is particularly economical.

Application:
We recommend 947 IV for marking painted and unpainted metals, rubber, wood as well as various plastics with light background. A suitability test should be carried out as too many different qualities are available to allow a reliable recommendation.

Drying time:
~10-25sec (metal)

Viscosity:
low viscosity, ~10-20sec
(Ford 4mm cup)

Stamp material:
Rubber, metal or special photo polymers

Stamp pad material:
We recommend only cartridges with felt or foam rubber filler for 947 IV. On flexographic printing systems, use closed ink reservoirs.

Thinner/cleaner:
Thinner 425

Available standard sizes:
50ml/g · 250ml/g · 1000ml/g · 5000ml/g
