

947 IV was developed especially for printing presses using cartridges with integrated felt or foam rubber reservoir. The binding agent prevents the ink cartridge diaphragms from sticking.

**Properties:**

This ink dries very quick, provides an intense colour and is particularly economical.

**Application:**

We recommend 947 IV for marking painted and unpainted metals, rubber, wood as well as various plastics with light background. A suitability test should be carried out as too many different qualities are available to allow a reliable recommendation.

**Drying time:**

~10-25sec (metal)

**Viscosity:**

low viscosity, ~10-20sec  
(Ford 4mm cup)

**Stamp material:**

Rubber, metal or special photo polymers

**Stamp pad material:**

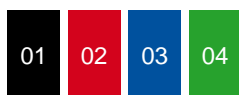

We recommend only cartridges with felt or foam rubber filler for 947 IV. On flexographic printing systems, use closed ink reservoirs.

**Thinner/cleaner:**

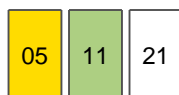

Thinner 425

**Available standard sizes:**

50ml/g · 250ml/g · 1000ml/g · 5000ml/g
