

Coloris 4000 P Metallic

COLORIS®

Water-based, quick drying pigmented special ink for universal use.

Properties:

This ink has a very high covering capacity, is colour-fast, remains very resilient after drying and does not smear. The metallic-coloured prints are extremely uniform, have sharp edges, gloss and covering power far exceeding all other glossy metallic stamping inks. 4000 P Metallic is particularly suitable for use on dark-colored materials because they offer excellent colour contrast. The special binding agent eliminates the need for solvents in the pigmented stamping ink so that it fulfils the latest VOC Guidelines

Application:

We recommend 4000 P Metallic for marking synthetic leather, leather, textiles of all types such as polyester, nylon and viscose, as well as for cotton, satin and linen. This unique new stamping ink is also excellent for permanently marking paper, plastic foils, rubber or metal.

Drying time:

~2 min (sheet metal)

Viscosity:

low viscosity, ~20 sec
(Ford 4mm cup)

Stamp material:

Rubber or photo polymers

Stamp pad material:

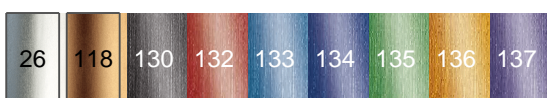

We recommend felt plate pads, however use in stamping machines with ink reservoir is also possible. The ink remains moist for stamping for a long period without drying out in stamp pads.

Thinner/cleaner:

Thinner 430
Cleaner 390

Available standard sizes:

50ml/g · 250ml/g · 1000ml/g

Opaque
