Luminous stamping ink II

COLORIS®

Colourless stamping ink visible as intensive blue fluorescent colour under UV light at a wavelength of 366 nm.

Properties:
It dries quickly on smooth, non-porous surfaces.This ink is not suitable for marking human skin!

Application:
We recommend this ink for non-porous surfaces such as plastics, metals and painted metals.

Note:
White surfaces are suitable for security markings only in extremely rare cases, because they frequently have an optical brightner which illuminates with the same colour in the same wavelength range. In these cases it is better to use the luminous stamp ink 4430 P yellow!

Drying time:
~60sec smudge-proof (metal)

Viscosity:
low viscosity, ~12sec (Ford 4mm cup)

Stamp material:
Rubber

Stamp pad material:
For manual stamping, we recommend our office stamp pads with felt inserts or felt plate and Soli plate pads. For automatic marking, presses with rubber ink rollers which operate with ink reservoirs are preferable.

Thinner/cleaner:
Thinner 410

Available standard sizes:
50ml/g · 250ml/g · 1000ml/g
