

Thinner 121

COLORIS®

Alcohol-like solvent mixture for thinning special stamping inks and for setting the desired viscosity.

Property:

Even thickened ink in the ink pad can sometimes be freshened up by adding small amounts of thinner. Can also be used to clean the stamp.

Attention:

However, too much dilution can lead to the loss of some important physical properties such as adhesion, opacity or colour strength!

Application:

We recommend this thinner for the following solvent-based paints: Stamping ink 121 P.

Dilution advice:

A certain amount of in a small container Prepare the paint, add a correspondingly small amount of thinner and stir. Repeat the addition of thinner until the desired viscosity is reached.

Available standard sizes:

50ml / g x 250ml / g x 1000ml / g x 5000ml / g
