

BA 4710

COLORIS®

BA 4710 is a fast drying, translucent, in yellow and white pigmented stamping ink which is weather-resistant and colour fast

Properties:

The bandwidth of this special stamping ink ranges from manual stamping, all the way to machine printing with flexographic printing presses particularly for marking light backgrounds. To mark darker surfaces BA 4710 P in yellow and white is available. However, if BA 4710 or BA 4710 P stamping ink dries too slowly for the customer, a drying accelerator can be used.

Application:

We recommend BA 4710 for marking painting and unpainted metals as well as painted wood with light background and BA 4710 P for darker background. Moreover, stamping is also possible on the back of mirrors, X-ray films, greaseproof paper, bicycle tubes and some plastic foils. A suitability test should be carried out as so many different qualities are available to allow a reliable recommendation.

Drying time:

~30sec (metal)

Viscosity:

low viscosity, ~12-40sec
(Ford 4mm cup)

Stamp material:

Rubber or special photo polymers

Stamp pad material:

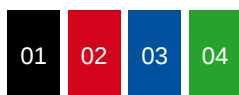

We recommend felt plate pads and the Soli plate pads as well as flexographic printing presses with ink reservoir.

Thinner/cleaner:

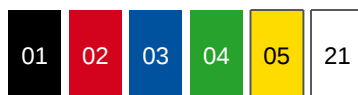

Thinner 410

Available standard sizes:

50ml/g · 250ml/g · 1000ml/g
