

981 is an extremely fast drying, translucent stamping ink developed specially for tin cans. The high quality binding agent gives better temperature resistance than with CO 4713.

Properties:

The stamp prints dry quickly on the tin cans without smearing, are resistant to steam, therefore can be sterilized with steam, and are resistant to boiling.

Application:

We recommend 981 for marking tin cans, painted and unpainted tinplate as well as aluminum and rolled sheet metal with light background.

Drying time:

~30sec (metal)

Viscosity:

low viscosity, ~12sec
(Ford 4mm cup)

Stamp material:

Rubber or special photo polymers

Stamp pad material:

We recommend felt plate pads for 981. In the case of automatic stamping machines, systems with an ink reservoir are preferred.

Thinner/cleaner:

Thinner 415

Available standard sizes:

50ml/g · 250ml/g · 1000ml/g
