186

COLORIS®

186 is an extremely fast drying, translucent special stamping ink for non-absorbent light coloured materials. The colours white and yellow are pigmented.

Properties:
The drying speed makes this version suitable only for machine stamping in flexographic printing machines.
Also available as slow drying version with increasing drying time as 186 III or 186 V-6.

Application:
We recommend 186 for marking painted and unpainted metals, rolled plates as well as various plastics with light background. Suitability tests should be carried out because too many different qualities are available to allow a reliable recommendation.

Drying time:
~10sec (metal)

Viscosity:
low viscosity, ~10-20sec
(Ford 4mm cup)

Stamp material:
Rubber or special photo polymers

Stamp pad material:
Presses and stamping machines with ink reservoir are recommended exclusively for 186.

Thinner/cleaner:
Thinner 425 (186)

Available standard sizes:
50ml/g · 250ml/g · 1000ml/g
