# Soli plate pad

COLORIS®

**This metal box with the replaceable foam pad is meant for fine-pigmented stamping inks and volatile solvent inks, which cannot be used with a normal office stamp pad.**

**Properties:**
The secret of these pads is their foam construction, the surface of which is smooth and almost without texture – fibres stuck to the stamp are a thing of the past. It is not possible to over-ink the stamp block because it will only load with ink on the relief. This makes it possible to reproduce the finest lines and lettering.

**Application:**
Pigmented special inks must be well shaken or stirred before application so that any pigment sediment is dispersed. We recommend this stamp-pad for use with so many stamp-pad inks, that it is not possible to list them all here.

Please request our recommendation in any specific case.

**Pads Available:**
Tin with 1 Soli plate
Pad surface size:
Size 1: approx. 165x90mm
Size 2: approx. 118x67mm

**Refill pack**
(3 Soli plates per pack)
