

Extremely versatile stamping ink. Excellent both for manual stamping as well as automatic marking with flexographic presses.

Properties:

Weather resistant, relatively colour fast, translucent, partially pigmented, solvent-based stamping ink.

Application:

We recommend translucent stamping ink R 9 for marking all light materials such as high gloss brochures, metal and plastic foils, painted sheet metal and wood as well as unpainted aluminum.

However, it is also well-suited for various types of rubber and plastics. Pigmented R 9 P can also be used for marking dark backgrounds, because it has a far greater covering capacity.

R 9 FP and the faster drying version R 9 FP ST are also suitable for marking food packages!

Drying time:

7 - 9 minutes (metal sheet)

Viscosity:

~ 15 seconds (glazing)
~ 65 seconds (pigment)
(Ford 4mm cup)

Stamp material:

Rubber

Stamp pad material:

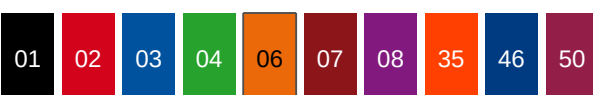

We recommend our special MARK II pad for keeping the ink moist for stamping for a long period without drying out. However felt plate pads, felt rollers, foam rubber rollers or the SOLI plate pads can also be used.

Thinner/cleaner:

Thinner 405

Available standard sizes:

50ml/g · 250ml/g
1000ml/g · 5000ml/g
