200 PR P

COLORIS®

200 PR P stamping ink is a special pigmented ink capable of remaining open for long periods developed especially for use in Self-inking rubber stamps like PRINTY's.

Properties:
This stamping ink is very economical and provides high colour intensity, colour fast markings. The binding agent and additive make this stamping ink excellent for marking cotton as well. The ink can be washed after 4-5 h.

Application:
We recommend 200 PR P for marking painted and unpainted metals, rubber, wood, PVC; various plastics as well as for natural fibers such as cotton and linen.
It is also possible to mark synthetic fibers such as polyester, rayon, nylon, Perlon, Elastan or Polyacrylic with 200 PR P. Suitability tests should be carried out because too many different qualities are available to allow a reliable recommendation.

Drying time:
~3 - 5 min (sheet metal)

Viscosity:
low viscosity, ~13 - 20 sec
(Ford 4mm cup)

Stamp material:
Self-inking stamps, flash stamps or rubber

Stamp pad material:
We recommend particularly self inkers with suitable PU foam or felt insert or felt plate pads, the SOLI
plate pads and MARK-II pads. The ink remains moist for stamping for a long period without drying out in all stamp pads.

Thinner/cleaner:
Thinner 420

Available standard sizes:
10x28ml/g · 50ml/g · 250ml/g · 1000ml/g
