S 10

COLORIS®

Much faster drying stamping ink as the universal ink of R 9, but it is also extremely versatile. It is ideal for manual stamping, but also for automatic labeling by means of flexographic printing.

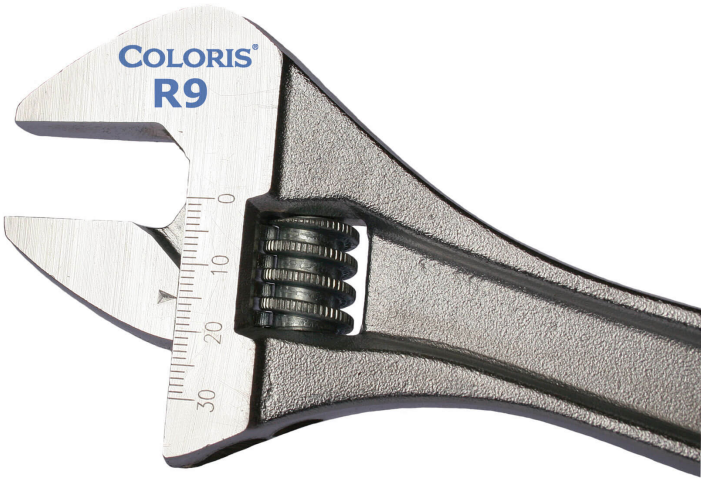

Features:
Weather resistant, good lightfast, dye-based stamping ink solvent based.

Application:
We recommend the translucent stamping ink S 10 for the identification of light materials such as Brochures, metal and plastic films, lacquered panels and wood, unpainted metals. But it is also very suitable for various rubber and plastic types.

If the lettering later once again be removed, it must be checked in advance whether the ink can be removed, in some plastics, the colour migrates into the ground.

Drying time:
3-5 min (sheet metal)

Viscosity:
transparent ~ 12sec
pigmented ~ 45 sec
(Ford 4mm cup)

Stamp material:
rubber

Medium Type:
It is recommended that the special MARK II ink pad, wherein the ink stays long for stamping without drying. It is also felt plate, felt rollers, foam rubber rolls or SOLI plate pads are used.

Thinner / Cleaner:
thinner 415

Available standard sizes:
50ml /g · 250ml /g ·1000ml /g · 5000ml /g
