

Luminous stamping ink 8530 PR COLORIS®

An invisible containing UV marker special ink that has been developed for self-inkers of COLOP and TRODAT which stays long fresh for stamping. This ink is great for quality controls in production areas where no visible QS-marks has to be seen. It dries quickly to non-absorbent surfaces and lights intense bluish-white under UV light.

Features:

It dries quickly to smooth, nonporous surfaces, although it remains moist for a long in the pillow. This ink is not necessarily suitable for marking human skin since there are no dermatological tests were carried out.

Application:

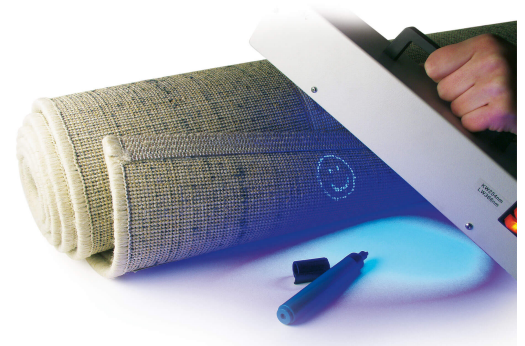

We recommend this stamping ink therefore suitable for all types of metals, such as ferrous metal, aluminum, steel and many plastics or other non-absorbent materials such as wood or rubber.

Note:

White surfaces are conditional suitable for safety markings. In the event that the material content optical brighteners that glows in the same band with the same colour under UV, a test should be made in advance whether the marking is visible.

Drying time:

~ 2-4 min smudge-proof (metal)

Viscosity:

low viscosity, ~ 20 sec
(Ford 4mm cup)

Stamp material:

rubber

Medium Type:

For stampings are selfinkers as PRINTY with PU foam, felt insert or felt plate suitable, as well as a rubber stamp with MARK II pillow or Soli cushion plate.

Thinner / Cleaner:

thinner 420

Available standard sizes:

50ml · 250ml · 1000ml
